Important Information for Correspondents and Customers

WE RESPECTFULLY CALL ATTENTION TO THE SUGGESTIONS ON THESE PAGES, WHICH, IF FOLLOWED, WILL AID IN THE PROMPT AND SATISFACTORY EXECUTION OF YOUR ORDERS

McGregor's Year Book

The distribution of this Catalogue, with the opening of another season, presents another of the greatest sales in the history of our business, and offers wonderful bargains in Roses and Plants of all kinds, Vegetables and Flower Seed, Fruits, etc. Our goods are grown in large quantities for wholesale purposes; our retail prices, therefore, are based on large productions giving our retail customers an easily appreciated advantage, and further by adopting a plan of special offers and collections and making our sales to you by mail, our expenses are reduced to a minimum, with the result that we offer you the lowest possible prices for all goods of our large and varied line.

Springfield, Ohio, U. S. A., is centrally located geographically and with unequal facilities for shipping orders by mail or express. Here is headquarters for growing and shipping of all kinds of Plants and especially of Roses where they are produced in greater quantities than any other place in the world.

Comparative Value of Roses

The roots of one-year plants being carefully protected in pots, permits of the shipping and successful planting anywhere. Roses of this size are to be recommended for all Rose-growing sections. If you wish the largest and best Roses for quick effect, then Roses of the two-year size from four to five-inch pots are to be recommended.

Don't think any Rose too small to do well.

Advantage of Pot Grown Roses

There is another advantage in planting pot-grown Roses; namely, that they can be planted at any time of the year. The ball of earth contains all of the fine fibrous roots, and when the plants are shipped transplanting can be done with no more injury to the plant than if the Rose had simply been removed to a larger sized pot. The growth continues just the same and the roots do not have to establish themselves, as is the case with the dormant plants. The pot-grown Rose, therefore, has many advantages over other Roses.

Instruction Leaflets

On different pages in our catalogue we offer leaflets giving full Cultural Directions on practically all of the different classes of Plants that we sell. Offering leaflets in this way we are not compelled to ask from those who purchase a limited number of articles a large price for a complete book of instructions. The leaflets are carefully prepared and will be found to contain important and valuable information on the growing of subjects they cover. Price, 2c each.

If You Wish Orders Held

Be sure to say so, then we can book your order until any later date desired; otherwise we assume order is wanted at once, and for shipment without further instructions.

Postage Stamps

These can be sent for fractional parts of \$1.00, or when postage orders cannot be had, provided two cents in stamps extra are sent with every remittance. Send perfect stamps only.

Our Prices

will compare favorably, we believe, with those of any responsible firm in the United States, and are so low we must ask cash with order.

Remittance With Order

Please send sufficient money to cover your entire order. The safest way is by means of postoffice order. If these are lost a duplicate can easily be obtained, and there is no danger of their being stolen, for no one can obtain money on them except the person to whom they are addressed. They can be obtained at all postoffices. The fee is but five cents for \$5.00 and under.

FREE OFFER

If you send us an order amounting to \$1.00 from a friend or neighbor who is not now a customer of ours, we will send you any one of the beautiful Roses shown in color on the back of cover of this book, free and postpaid. If order from new customer amounts to \$2.50, we will send you any three of the Roses. If order amounts to \$5.00 we will send you the six Roses.

Surprise Offer—After-Season Sales

Propagating as we do six months in advance of the selling season, we must not be satisfied until we have taxed the limit of our capacity and made allowance for natural increase of business. In these 98c collections we give several dollars worth of plants. The plants in these collections must be strictly our selection. Orders accepted any time during the spring for delivery June 1st.

Parcels Post

Heretofore limit of weight of a package of mailable plants, bulbs and seeds has been four pounds. The newly established system of Parcels Post simply gives the added privilege of transferring through the mails, packages of mailable plants, bulbs, seeds, etc., of increased weights. Do not construe this to mean, however, that the increased size of package allows carrying express size plants. It only permits of sending you larger orders of mailable plants.

Shipment of Plants

Mailable plants, bulbs, and seeds are sent by parcels post mail. See rates, page 1. Express size plants travel at special rates from Springfield at from 25 to 33 1/2 per cent less than regular rates. Purchaser pays expressage.

Our Nursery Department

is separate and distinct from our greenhouse, and it is necessary, therefore, that all items from this department (page 96) be shipped direct from our nursery under separate transportation charges.

Three Wonderful Roses A Trio

THAT HAS EARNED ITS TITLE. IN SIZE, COLOR, FORM AND FRAGRANCE, THEY ARE UNEXCELLED. ALL HARDY VIGOROUS GROWERS. A MOST WONDERFUL COMBINATION. A VERY IMPOSING AND IMPORTANT TRIO OF ROSES.

The National Trio

The National Trio offered here constitutes an important Trio of Roses. In shapeliness and color, fragrance and form the three varieties offered here have no rivals among Roses. They are varieties for the amateur and professional. They thrive anywhere and bloom under more varying conditions than

many other varieties. There are other Roses that are a real delight, and others that one should grow, but there are none that excel in all points the National Trio, red, white and pink American Beauty.

The National Rose of America The American Beauty

The Prize RED Rose.

Greatest of Them All.

(Hardy summer blooming, should be protected.) A hardy Rose of the larger size, having the everblooming qualities of the Tea Rose with the delicious odor of the Damask or Moss Rose, and equally valuable for winter or summer flowering. The EACH flowers are so eagerly sought that they sell in the larger cities during the holiday season at the extravagant price of from \$1.50 to \$2.00 for a single bud or flower. In color it is a deep, brilliant, rosy-carmine, shaded toward the center with rich carmine-crimson. The back of the outer petal takes the color of lighter dull carmine. The American Beauty is one of the most vigorous Roses we have. It makes the heaviest stems and the largest bush, it not being unusual to see a rampant bush with a dozen canes as thick as one's finger and several feet in height. The American Beauty is unquestionably the most popular Rose now before the public, a popularity due principally to its value as a winter forcing variety. It should be protected outdoors in the winter. Sold under positive guarantee as to being true to name. ROSES

OF LATE INTRODUCTION

The best bloomers for the yard and garden are included in these newer Roses of all kinds. Those offered are of unusual value. Just as Rose growers in America have come to recognize the essentials that must be present in a novelty so in Europe these same characteristics are being bred into the seedling, and it is with confidence that we recommend the following magnificent varieties.

Irish Fireflame

"Color ochrey old gold, delicately sheened lemon and crimson."

(Summer blooming, hardy with protection.) In the spiral bud state it is deep maddery-orange, splashed with crimson, which, as the bud develops, becomes fiery orange-crimson, changing to solid delicate orange which becomes, as the flower fully opens, rich, satiny ochrey old gold delicately sheened and veined—as if sunset tinged—with pure crimson and pure lemon zone against which the light fawny anthers form a beautiful contrast, a chatoyment of colors, combined with the larger size—5¼ inches across—and finish of the bloom, instantly pronounce its loveliness. Its gorgeous superimposing intense color gradations spontaneously convey the idea of a flame. The handsome, graceful wood is shiny purple-chocolate, and is festooned with varnished, deep, bronzy, green, ovate foliage. Deliciously and strongly perfumed. Awarded gold medal, 25c each; 3 for 62c; \$2.00 doz. Larger plants, 60c each; 3 for \$1.48; \$4.50 dozen.

25c

W. C. Gaunt

"Rich in color with rich tea fragrance."

(Hardy ever-blooming Garden Rose.) The flowers are of good size with pointed buds with naturally reflexed guard petals of brilliant velvety vermilion, tipped scarlet. The stems are rigid, the habit branching, with large oval beech-green foliage. It is a beautiful Rose and will be grown largely when better known. 30c each; 3 for 75c; 12 for \$2.40. Large two-year-old plants, 60c each; 3 for \$1.48; 12 for \$4.50.

Killarney Brilliant

"Undoubtedly the best of the Killarney type."

(Summer blooming, hardy with protection.) The introducers are to be congratulated sixteen years after the advent of Killarney in giving us this distinct novelty, which is undoubtedly the best of the Killarney type. Has the same habit of growth and freedom of bloom as its parent, while the flower is more double. Color brilliant pink and varies like Killarney. In the garden in bright weather is clear pink, and in dull weather almost crimson. 30c each; 3 for 75c; 12 for \$2.40. Larger plants, 60c each; 3 for \$1.48; 12 for \$4.50.

30c

Robin Hood

"Glorious rosy-scarlet, large, full and beautiful bloom."

(Summer blooming, hardy with protection.) This new Rose has a glorious rosy-scarlet color that is at once soft and bright and lasting; the bloom is full and of the beautiful build of the H. P.'s. Grand grower, heavy caned and profuse in foliage; flowers freely produced. One-year plants, 25c each; 3 for 62c; 12 for \$2.00. Large two-year-old plants, 50c each; 3 for \$1.25; 12 for \$3.60.

Lady Plymouth

"Deep ivory-cream petal faintly flushed pink."

(Summer blooming, hardy with protection.) A most distinct and meritorious Rose of the "Souvenir de Pierre Notting" type, whose delicate pearly but deep ivory-cream petals are very faintly flushed pink. It is delicately pure tea perfumed. Gold medal, N. R. S., and silver medal, Crystal Palace, London. 25c each; 3 for 62c; 12 for \$2.00. Larger plants, 50c each; 3 for \$1.25; 12 for \$3.60.

Columbia, a new and wonderful Rose; blooms large and full, perfect shape and form, and enormous petals. Color peach-blow pink, deepening as the flower opens. 40c and \$1.00.

Columbia

Wonderful peach-blow pink, the Queen of the Rose Creation
In this new Rose we have something new and wonderful. A perfect peach-blow pink which deepens as it opens. The stems are long and stiff and nearly thornless. The color effect of this great novelty is really marvelous, representing a shaded electric light, even the older and expanded blooms retain their fascinating color to the last. The blooms are very large and full, of perfect shape and form, with enormous petals and grand general character. Its glossy foliage is mildew-proof. It opens its blooms in all weathers, flowering freely and continuously throughout the whole season. The grandest novelty among modern Roses. Very sweetly scented, superb. Price, well-established plants, 40c each; 3 for \$1.00; 12 for \$3.00. Larger plants, \$1.00 each.

Wonderful Triumph in Rose Growing. Perfectly Hardy, will grow anywhere. Perpetual blooming. (Hardy Climbing, June Blooming). The ambition of Rose specialists has long been to produce an ever-blooming type of the famous Crimson Rambler. This has been accomplished in this variety. It surpasses any other Rose for brilliancy of display. Blooms from early spring until well along in the autumn, bearing freely large, brilliant crimson clusters of flowers. It has the additional advantage of blooming profusely on the young wood in one-year-old plants. Strong young plants, 22c each, 3 for 55c, \$1.75 per dozen; strong 2-year-old plants, 44c each, 3 for \$1.10; per dozen, \$3.20.

Dr. W. Van Fleet

A very delicate shade of flesh-pink on the outer surface, deepening to rosy-flesh in the center. The flowers are full and double, delicately perfumed. The Popular Hardy Pink Climbing Rose. A Wonderful Rose of Wonderful Color

DOROTHY PERKINS

The Most Graceful, Free-Flowering and Vigorous Climbing Rose
Flowers produced in clusters—thousands of them on a single plant

(Hardy June Blooming). A beautiful shell-pink Rose, of sweetest fragrance, useful for many purposes, and giving wonderful satisfaction. Even when the flowers commence to fade the color is still pleasing, being then a lovely deep rose. The flowers are large size for this class of rose, usually about one and one-half inches across; are borne in clusters of from ten to thirty and are very double; the petals are very prettily rolled back and crinkled; the buds are remarkably pretty, being pointed in shape and of just the right size for the buttonhole. In vigor the Dorothy Perkins is all that can be desired, making in a single season strong lusty shoots, often ten to twelve feet in height. In habit of growth it is rather upright, having much the habit of the Crimson Rambler. It is therefore especially adapted as a companion rose to Crimson Rambler. The flowers are very sweetly scented, a characteristic not possessed by most other roses of this class. The foliage is of deep green, of thick, leathery texture and remains on the plant in perfect condition till well on into winter, making it almost an evergreen variety.

24c

each; 3 for 60c; \$1.90 per dozen, postpaid; 2-year-old plants, 48c each; \$3.40 per dozen; large 3-year-old plants, 85c each, by express only; 6 for \$3.56; \$7.00 per dozen.

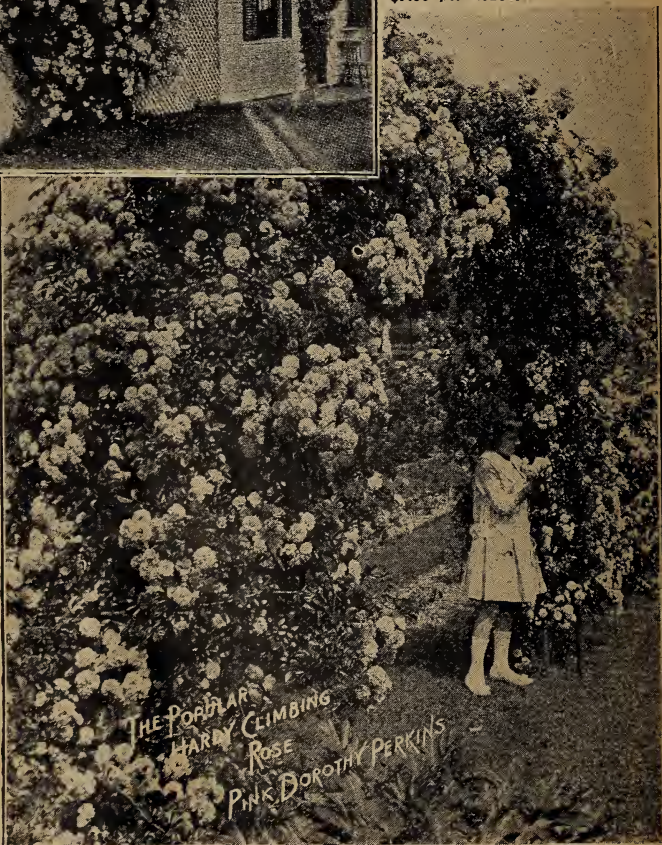

White

Dorothy Perkins

(Hardy Climbing, June Blooming). A pure white sport of Dorothy Perkins, of same habit of growth; a splendid companion, as it flowers at the same time. A most valuable addition to this class.

20c

each; 3 for 50c; \$1.60 per doz., postpaid; 2-year-old plants, 40c each, \$3.00 per doz.; large 3-year-old plants, 85c each, by express only; 6 for \$3.56; \$7.00 per dozen.

Dorothy Perkins—A beautiful pink Rose of the sweetest fragrance. Useful for a hundred purposes; vigorous and hardy; wonderful in growth and color. Growing in value every year, it is a Rose for all. 24c, 48c, 85c.

THE BEAUTIFUL Pearl of the Garden

(PERLE DES JARDINS)

"A perfect and popular Rose with absolutely no weak point."

The one Tea Rose which you cannot possibly do without. It has absolutely no weak point, but is a perfect and popular Rose. The color is faultless, whether the waxy petals show the rich cream tint of cool weather or take richer golden shades which a warmer sun gives them. The form of the bud is rich, rounded and luxuriant. It is only equalled in beauty by the open Rose, which is full to the center and large. It is no shy, creeping plant, but is fairly riotous in growth, sending out quantities of beautiful foliage, thick, glossy and dark, every branch being tipped with the dark red-dish-maroon of the young shoots and bearing its buds high above the leaves. 25c each; 3 for 62c; \$2.00 per dozen. Large two-year plants, 50c; 3 for \$1.25; \$3.60 per dozen.

25c

Marie Guillot

In all the range of colors among Hybrid Teas it stands unique and quite distinct. Its color is coral-red, center bright salmon; flowers large, full and of splendid form, a grand bold, well-built flower, perfect in shape and form, of the most modern type, extra perpetual flowering. A grand exhibition and garden Rose, with a perfect habit of growth, the most attractive color; a really superb variety; very fragrant. 22c; 3 for 55c; \$1.75 per dozen. Two-year, 44c; 3 for \$1.10; \$3.20 per dozen.

Madison, The Grand White Rose

"Marvelously free-blooming and very sweet scented."

(Summer blooming, hardy with protection.) One of the most beautiful Roses we know of. The petals are of enormous size and of ivory-like substance. The flower is unusually long and pointed, and retaining its shape and form practically to the last. A strong characteristic is the way it unfolds its guard petals, the inner petals retaining that beautiful spiral form making it perhaps the most model shaped flower grown. The color is a pearly-cream. It is also marvelously free blooming and very sweet scented. 19c each; 3 for 48c; \$1.55 per dozen, postpaid. Two-year size, 44c; 3 for \$1.10; \$3.20 per doz.

The popular Boston Fern has had the most phenomenal sale of any decorative plant grown. Fronds broad and heavy, often measuring 6 in. or more across, and five or six feet long. Owing to the weight of the foliage, the plant assumes an exceedingly massive yet graceful appearance, and owing to the fullness of the fronds even small plants make much more symmetrical and beautiful plants than the popular Boston Fern. The divided pinnae or miniature fronds which are so gracefully arranged, keep growing constantly, overlapping each other and showing two shades of green, while the center and main part of the frond is rich dark green, the contrast producing a beautiful effect.

BEAUTIFUL DECORATIVE FERNS

The Boston Fern

"No Single Decorative Plant has ever proven more popular."

This Fern is one of the best known varieties grown, and in the long years of its cultivation has proven worthy of a place in every home. Called the Fountain Fern, for its exceptionally graceful habit of growth, and until the introduction of other types was considered the most valuable house plant to be had.

It is of easy culture and a very rapid grower, producing fronds of unusual length, frequently measuring six to eight feet in length. Its unusual freedom of growth without especial care has made it popular with all admirers of house plants, and although there have been many new introductions from this the parent plant, it is still the most popular variety in cultivation. Price, nice young plants, 19c; 3 for 48c; stronger plants, 30c; larger plants, 60c; extra large plants, \$1.25; heavy selected plants, \$2.00.

The Grand New Dwarf Fern "Teddy Jr."

This magnificent Fern is a sprout from the now famous Roosevelt Fern, and while it produces a shorter frond it retains all the valuable characteristics of the parent. Fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds to their charming decorative effect. It is such a compact, vigorous grower that it will thrive under most adverse conditions. Price, young plants, 23c; 3 for 57c; larger plants, 50c; 3 for \$1.25; heavier plants, \$1.25.

The plant makes a comparatively dwarf compact growth, the fronds, while dense, firm and rigid, are still graceful as the illustration shows. The foliage is also of a darker green than the original Boston Fern. All in all, it forms an ideal plumed Fern, possessing all the merits of former introductions while having a distinctive character that makes it of especial value. Price, strong plants, 24c; 3 for 60c; larger plants, 45c; 3 for \$1.12; heavy selected plants, 89c.

POPULAR PORCH AND BASKET FERNS

Lace Fern 26c

One of the Most Beautiful and Popular
Foliage Plants of the Century

A Decorative Plant of Unusual Value

(*Asparagus Plumosus*)—The family of *Asparagus* plants comprises a number of varieties. Some are climbers, some drooping or trailing, some erect and bushy. Many of them are highly prized for their beautiful and graceful foliage, and the two varieties which we list on this page are practically the most popular and valuable of all. The variety *Plumosus* (*Asparagus Plumosus Nanus*) is a tall climbing decorative plant and one of the rarest and of delicate beauty. Its bright green foliage is extremely fine and plume-like. The fronds grow from six to eight inches in width and when cut retain their color and shape for weeks. The plant may be grown as a pot plant, a bushy form or climbing. *Asparagus* possess the advantage of being more graceful and its foliage finer than those of the most delicate Fern. As a house plant it will thrive under practically all conditions. The *Asparagus* likes a good rich soil and fairly warm temperature. The plant does best and carries the richest color of foliage when it is kept in a growing condition through a plentiful supply of nourishment. *Asparagus* is comparatively free from diseases, and with all its good qualities, and practically no bad ones, it ranks as one of the first decorative plants to be had. Nice young strong growing plants, 26c each; three for 65c; \$2.05 per dozen. Stronger plants, 38c; three for 95c; \$2.90 per dozen. Larger plants, 60c; three for \$1.48; \$4.50 per dozen.

FEATHER FERN 24c

Unsurpassed for Window Boxes or
Hanging Baskets

Foliage Graceful and Drooping Dense
Glossy Green

(*Asparagus Sprengerii*)—The *Asparagus Sprengerii* gives us a plant of the bushy and drooping form of the *Asparagus* family. The foliage is composed of dense glossy green, graceful and drooping branches. The Feather Fern or *Asparagus Sprengerii* is probably of a hardier nature than the *Plumosus*, and subjects itself to wider usage. It is especially valuable for window box and hanging basket planting, for vases and as specimens when grown in pots or as tub plants. The Feather Fern or *Asparagus Sprengerii* gives us a more valuable house plant, being one of easy culture, the sprays growing four to five feet long, and when the foliage is used for cut-flower work it retains its freshness for an unusual length of time. The Feather Fern is particularly free from troublesome insects or diseases. The plants are of rapid growth, succeeding well in ordinary rich soil, and there is every reason to believe that all plant growers can have the greatest success with them. Nice strong growing young plants, 24c each; three for 60c; \$1.99 per dozen. Strong plants, 36c each; three for 91c; \$2.75 per dozen. Larger plants, 58c each; three for \$1.43; \$4.20 per dozen.

Whatever the opinions of rosarians may be relative to the hundreds of Roses now in cultivation, all must give way in distinctiveness to the world famous Rose La France. It is a wonderful variety from any point of view either for exhibition, for border and bed planting, or for cut-flower work with florists. The freedom with which it blooms is remarkable, being in flower practically the summer through, and on well cultivated plants the blooms are models of perfection. The type of the flower is distinctive, buds large and solid, but with an exquisite reflex of petals, giving it an elegant finish not found in other varieties. In coloring La France is unsurpassed, being an exquisite soft pink shaded silvery-rose. The flowers are large, and of that graceful, decided rose formation that is so much desired. La France is one of the most sweet scented of Roses, having a fragrance all its own. Wonderful as it is in coloring and fragrance of its flowers, the marvelous freedom with which it grows and blooms the entire season and until late in the autumn, will make it known as everybody's Rose. Price, nice one-year plants, 24c each; 3 for 50c; 12 for \$1.90; stronger plants, 50c each; 3 for \$1.25; \$3.60 per dozen.

CARNATIONS

The Popular National Flower

When the people throughout the country were vainly seeking for an appropriate flower acceptable to all, as our National Emblem, nature opportunely came to their assistance by presenting the improved Carnation—the product of American soil—which seems especially created for that purpose, uniting the red and white flower with foliage of metallic hue. While its is generally conceded that the rose ranks first for producing flowers for cutting the Carnation is gaining in popularity for its profusion of bloom, easy culture, and for the exquisite fragrance of its flowers. The last few years have seen an entirely new Carnation, forming one of the most

beautiful and desirable flowers we have, flowering freely during the summer and fall in the garden, and with proper attention and care, giving an abundance of flowers indoors in the winter. We take pride in offering the following collection:

Enchantress Supreme

A light salmon-pink Carnation, having the characteristics of the popular and valuable Enchantress family of Carnations, which has proven so profitable to the commercial grower. Many of the best growers in the country are placing it as their leader in its color. Very highly recommended. Price, 20c each; 3 for 50c; \$1.90 per dozen.

White Enchantress

Flowers pure white, fragrant, large—three inches and over; center well filled, rounding the flower to a most pleasing form; the color is very pure. Price, 20c each; 3 for 50c; \$1.90 per dozen.

Pocahontas

Carnation of deepest crimson coloring. The color of this variety makes it a valuable sort. The flowers are of large size, keeping well and are ideal for cut

flowers. The growth of the plant is strong and erect and the flower stems straight. Price, 20c each; 3 for 50c; \$1.90 per dozen.

Benora

A grand variegated Carnation. The flowers of this kind of variety will always be popular because they give a life in the flower that is not to be had in some of the solid colors. Price, 20c each; 3 for 50c; \$1.90 per dozen.

Matchless

Regarded by many as the best white Carnation yet produced. At certain seasons the variety is known to carry a tinge of color, which, however, seems to enhance rather than detract its beauty. Unusually fragrant. Price, 20c each; 3 for 50c; \$1.90 per dozen.

Brilliant Flaming Scarlet Carnation, Nebraska.

Nebraska

Tall brilliant flaming scarlet flowers of large size, well rounded form. Strong growing, free flowering, blooms being produced on long strong upright stems. Clove-scented; ideal for cut flowers. Price, 20c each; 3 for 50c; \$1.90 per dozen.

The Show Dahlias are the Dahlias of our grandmothers' time; somewhat stiff compared with the Cactus and Decorative, but their large size and brilliant colors make them extremely popular.

Peony-flowered Dahlias Flowers are semi-double, having two, three or more rows of broad, flat, loosely arranged petals, surrounding a conspicuous rich golden-yellow center. Petals are often pointed, and sometimes twisted, and in some varieties the inner row of petals twists and curls over the center, giving the appearance of a Japanese Peony, hence its name.

Cactus Dahlias make up a family of Dahlias the flowers of which are loosely arranged, with petals irregular in outline and long and twisted. They are strong growers and profuse bloomers.

Hardy Monthly Blooming Hedge Rose,

Clothilde Soupert 19c

A Pinkish-White Rose of Peculiar Charm. The bushy and symmetrical habit of growth of the old favorite Rose Clothilde Soupert makes it a variety particularly adapted to hedge planting. The growth is vigorous and sturdy, plant attaining good size. There is no more valuable Rose in its class, and the most careless observer cannot fail to note the delicate color and the profusion of bloom that the variety possesses. The plants carry flowers well into the frosty weather, the blooms being shell-pink in color, shaded to silvery-rose; the outer petals pearly-white, the flowers carrying a touch of rosy-pink near the center of the bloom. The unusually full and double blossoms of delicate and pleasing fragrance together with all the other points of merit the variety possesses, makes it one of unusual value. Price, nice one-year-old plants, 19c each; 3 for 48c; 6 for 94c; 12 for \$1.55; \$13.50 per hundred (25 or 50 at hundred rate). As the bulb is perfectly eight to twelve in number, of a delicate lilac-pink shaded with clear blue. As the bulb is perfectly hardy without any protection it can be planted either in the fall or spring. Cover the crown about four inches. Very useful for the border or among shrubbery. The Famous Yellow Rose **Marechal Niel**

(Summer blooming, hardy with protection.) The fame of the superb yellow Rose Marechal Niel, with its large, deep, golden-yellow flowers, is world-wide. It is almost universally held to be the finest Rose for indoors or outdoors, where the climate admits of its cultivation. In the North the plant should have careful protection in open ground during the winter. Its magnificent golden-yellow flowers are almost massive in dimensions, and reports from Southern California growers tell of single plants showing one to two thousand blooms at a time. As many as four hundred perfect blossoms have been taken from a single plant within a couple of months. All in all it is one grand Rose. It is of strong growth and beautiful foliage. It is grand in petal, shape, color, fragrance, lasting qualities and size, an extremely free bloomer and flowers throughout the season. Contrary to many Roses, which lose their color after planting, Marechal Niel decidedly improves and takes a deeper yellow after being kept for a day or two. The tea fragrance is strongly present in this Rose. It is a variety which practically stands by itself. Price, strong one-year plants, own roots, 25c each; 3 for 62c; 12 for \$2.00, postpaid; nice two-year plants, 50c each; 3 for \$1.25; 6 for \$2.15. Extra large plants, 75c and \$1.00 each.

Dwarf Fruiting ORANGE

26c

Dwarf free-flowering variety, which is suitable for pot culture, and which with anyone proves one of the most desirable pot plants it is possible to possess. While it will grow three or four feet high and branch freely, it is not an uncommon thing to see little cutting plants five or six inches high full of bloom, and even bearing one or two medium-sized oranges. The fruit at its best is not more than one-half the size of an ordinary orange, but is very bright and beautiful in color, delicious in quality; but it is for its flowers more than its fruit which commands it to general cultivation. When it blooms it is so full that it seems to be all flowers. The pure waxy-white blossoms emit a delicate yet powerful fragrance which is surpassed by no other flower. Price, nice plants, 26c each, 3 for 65c, 12 for \$2.05; large plants, 38c each, 3 for 95c, 12 for \$2.90. Large plants by express only, 50c each, 3 for \$1.25, 12 for \$3.60.

American Wonder LEMON

Actual Weight of Fruit Two to Three Pounds.

24c

A true everbearing Lemon. The tree has fruit in all stages of development, from the size of a pea up to the ripe fruit, showing it to be a true ever-bearer. Fruit weighing over four pounds has been taken from a tree. The American Wonder Lemon far excels the ordinary Lemons for making pies. The plant is of very easy culture, flowering and fruiting in ordinary good soil. Flowers are fragrant as orange blossoms, which they greatly resemble. The plant does best under heat and moisture. The growth can be pruned to any size or shape. In winter when the plant makes comparatively little growth the soil or potted plants should be kept rather on the dry side and the leaves and stems sponged weekly with a strong solution of ivory soap. Price, 24c each, 3 for 60c, 12 for \$1.90; large plants, 50c each, 3 for \$1.25, 12 for \$4.50; extra large, 3-year-old plants, 75c, 3 for \$1.84, 12 for \$6.10, by express only.

The Wonderful Hardy Climbing Rose CLIMBING AMERICAN BEAUTY

Climbing American Beauty, the new porch Rose, gives us a new Rose of wonderful beauty and merit. It is a cross between the world famous cut-flower Rose, American Beauty, and an unnamed seedling. It is an American introduction, the product of American rose growers. The object in producing this new Rose, the introducers say, was to produce a Rose of strong constitution, freedom of growth and bloom, hardness, and foliage resistant to mildew and other diseases. In the Climbing American Beauty are combined all the qualifications sought. It is perfectly hardy, strong growing, making canes from ten to fifteen feet in a season, a perfect mass of bloom in June and produces flowers occasionally all through the growing season. The foliage is large, bright, glossy green, and never shows signs of any of the diseases that affect Roses. The color is a soft, glowing red, identical with its pollen parent, the American Beauty, and with the same exquisite fragrance; a quality not found in all climbing Roses. The flowers are of a size three to four inches in diameter, finely formed on long stems, and are produced in great profusion. This new Rose will bloom in almost any situation where a climbing or pillar or porch Rose is desired. It is one of the early Roses to bloom in the spring, coming into flower the latter part of May and the early part of June and continuing in full flower for a long time. Success beyond expectations has been found in producing a climbing Rose of the same color, size of flower and fragrance of its pollen parent, the American Beauty, with the addition of better foliage and blooming qualities; one plant producing twenty times as many flowers in June as the American Beauty bush rose. Price, nice strong one-year-old plants, 30c each; 3 for 75c; 12 for \$2.40. Two-year-old plants, 60c each; 3 for \$1.48; 12 for \$4.50. —A most beautiful
ornamental plant from
the Sandwich Islands.
Excellent for house,
window or table. The leaves are
distinctly variegated white and
green, thick and waxy-like and
have the appearance of being
powdered with frosted
silver. The fleshy leaves
enable them to with-
stand the dry air of liv-
ing rooms much better
than the great majority of

house plants, they do well under
irregular temperature without
damage. The Watermelon Be-
gonia requires shade in the sum-
mer, but should be given full sun
in the winter and less water than
the majority of plants. They
should not be kept overwatered. A
loose soil provided with good
drainage places them at their best.

splendid large flower on long stems, of glistening light pink. 15c per packet.
